

Part Labeling Overview:

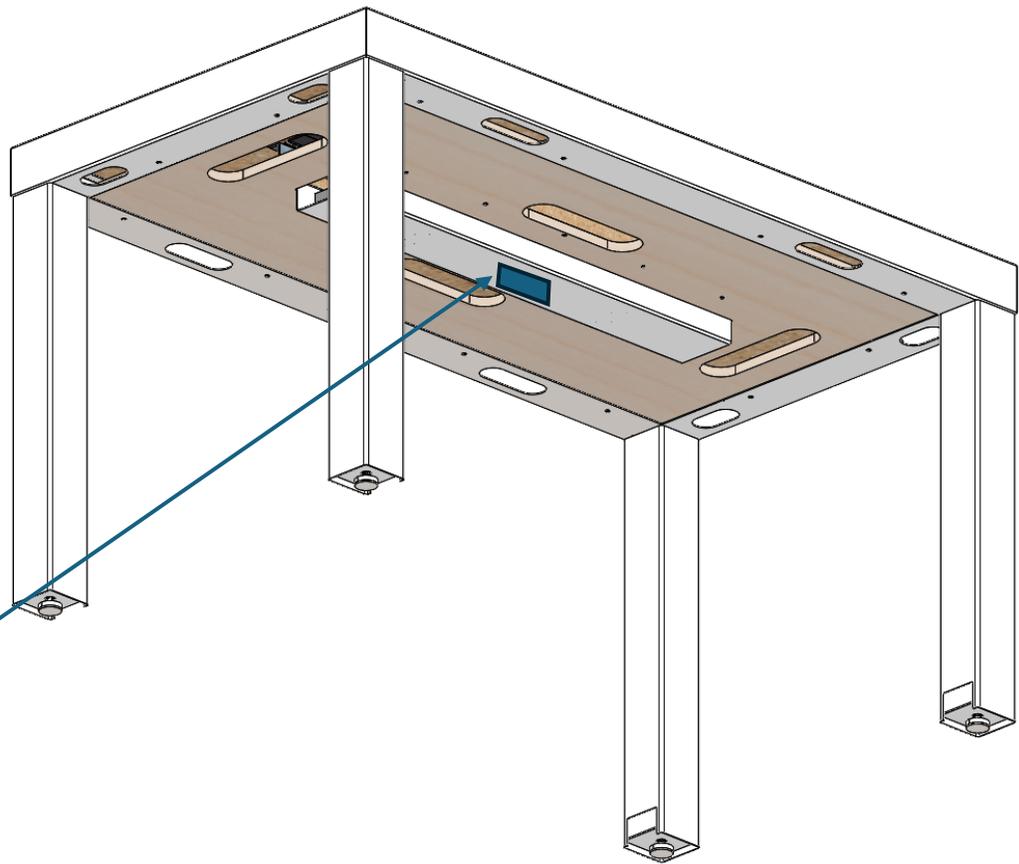

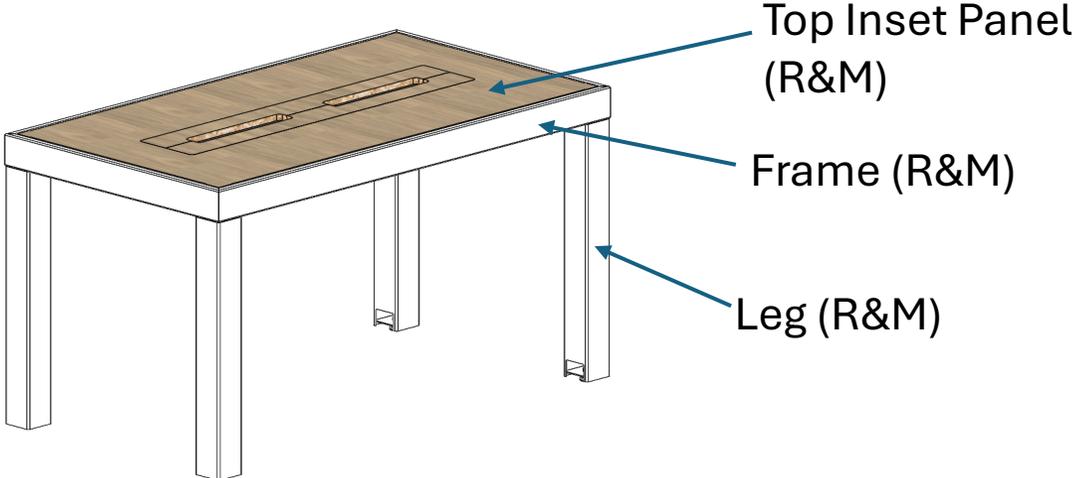

Labeling helps aid in the identification, maintenance and reorderability of supplier parts. At least one printed label must be adhered to each re-orderable part featuring that part's part number. To ensure consistency across all presentations, part numbers may not be printed directly onto parts.

Supplier Expectations:

- Design: White label with black type, font no smaller 8pt
Size: .5" x 1.5"
- Substrate: Durable; this is a permanent identification tool
- Content: Part number
- Placement: Adhere the label to the exterior of the fixture, preferably behind or beneath. It must be discreetly placed where it can be located by Blue Shirts (without extensive disassembly) but not visible to customers
- Alternate sizes: To use an alternate size, you must get pre-approval during the prototype submission process
- Small parts: Use the largest possible label while maintaining discreet placement and number legibility
 - If a part is too small for a label, it should be placed on the part packaging

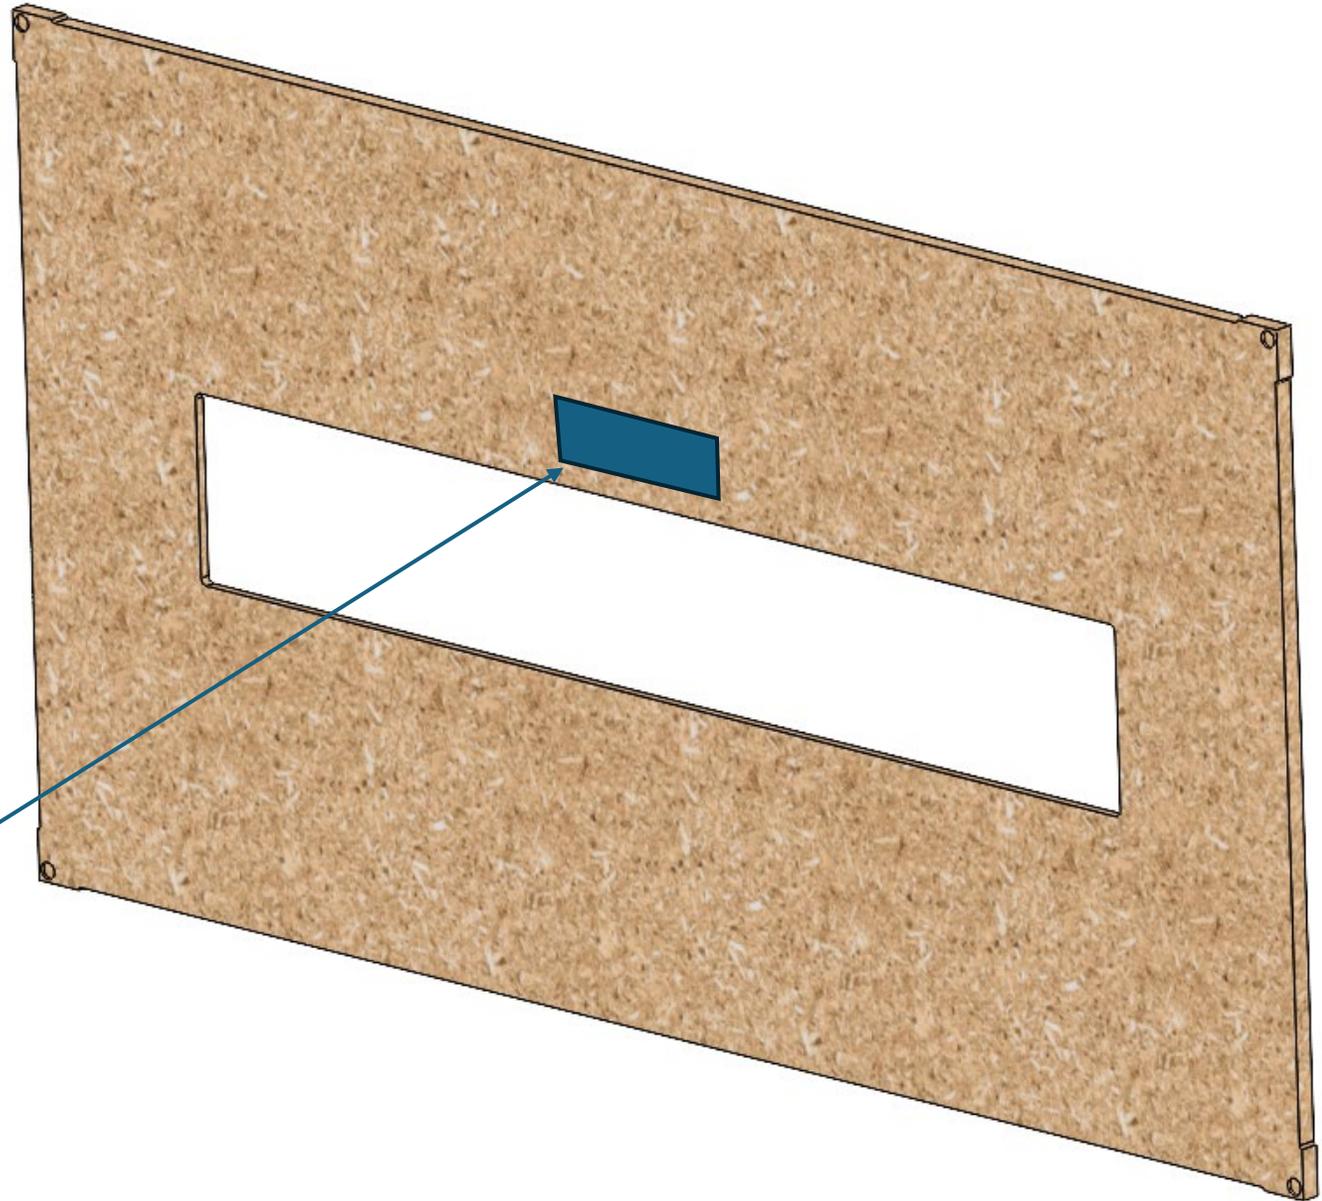

See next page for example placement

Part Labelling Guide – Table Example

Label underside of table **assembly** (kit) with Best Buy part number and description as close to center as possible, ensure label does not conflict with R&M part label placement.

Tabletop Inset Panel Example:

Label back (underside) of panel with Best Buy part number and description as close to center as possible

Table Leg Example:

Label inside leg with Best Buy
Part Number and description
near the top attachment point.

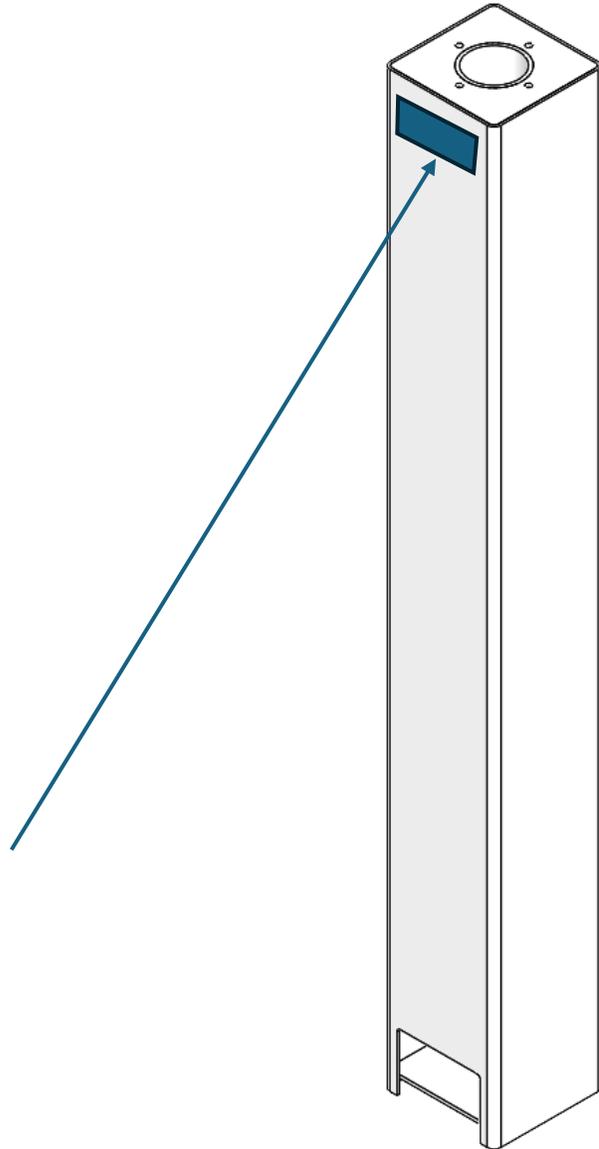

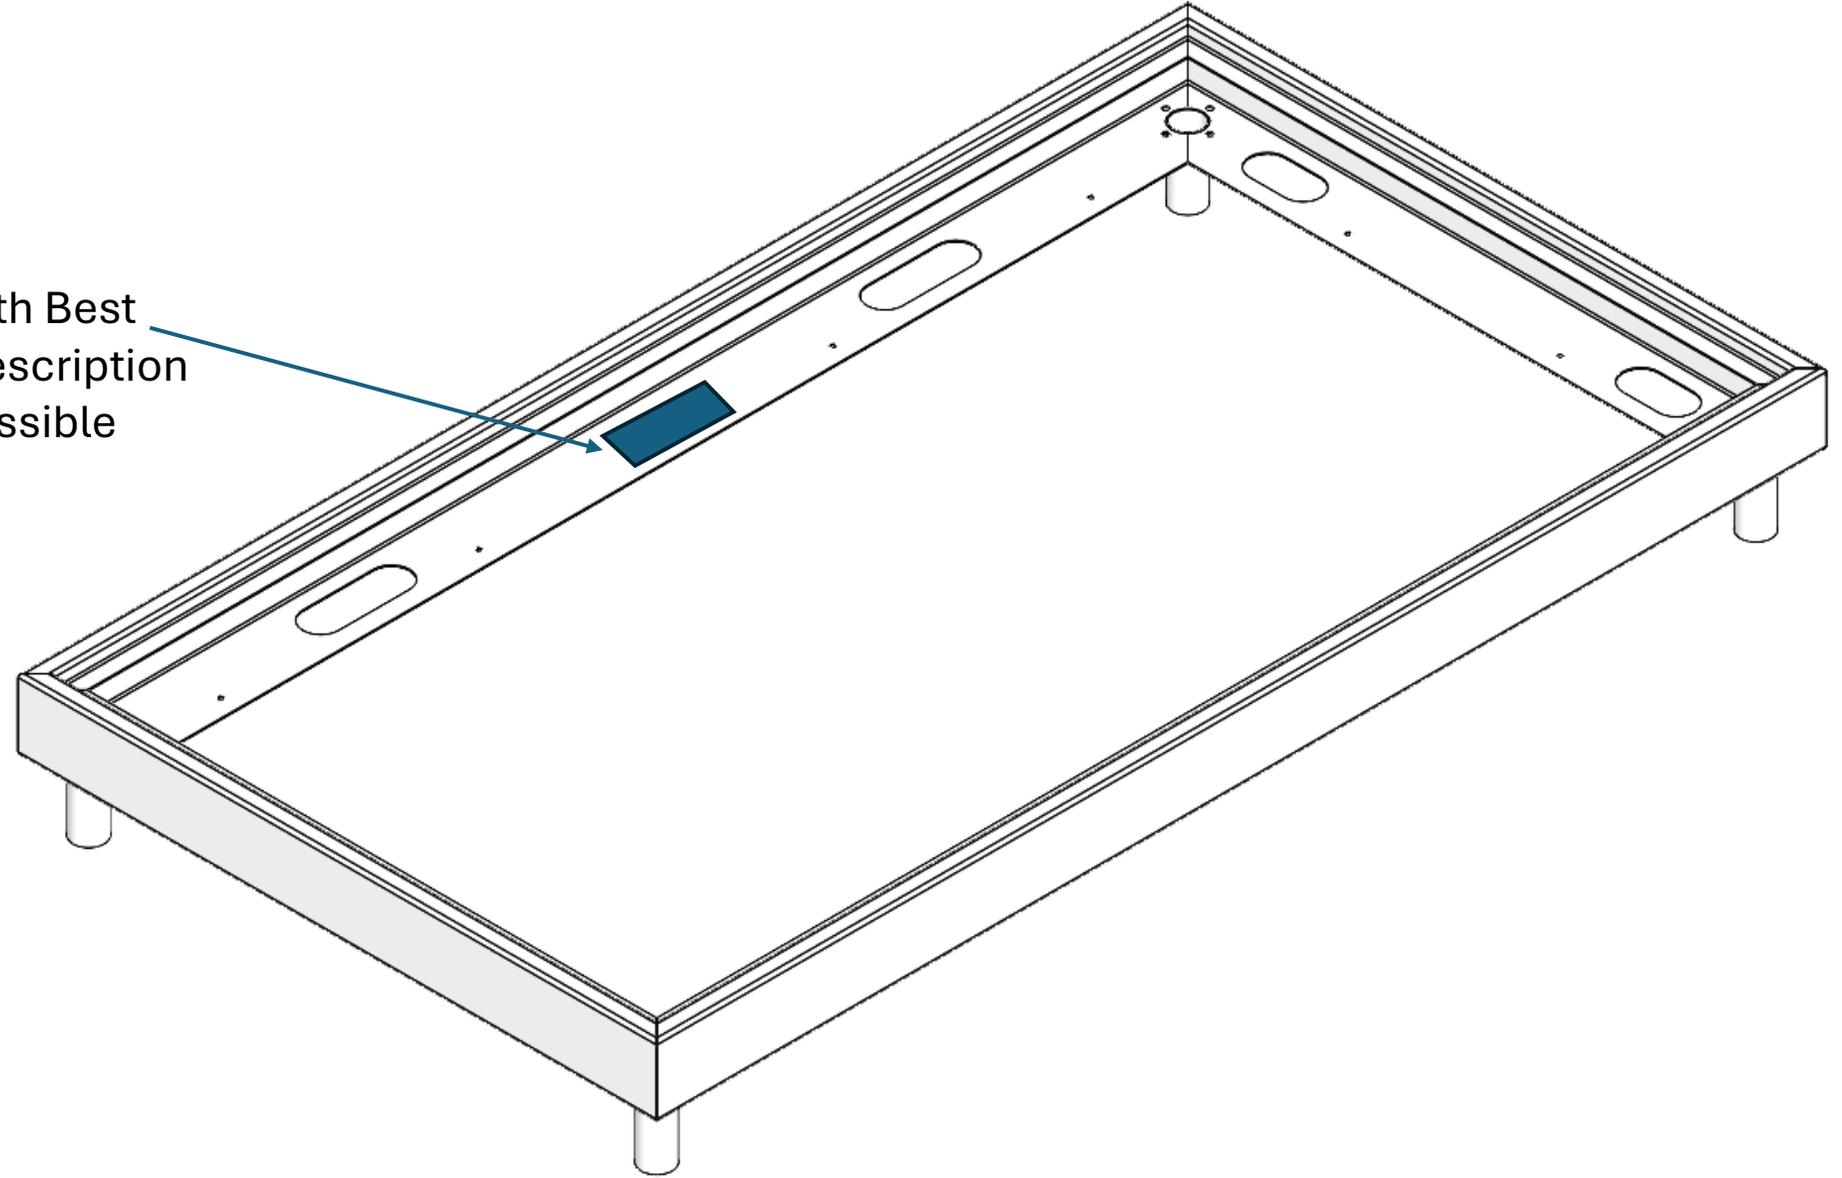

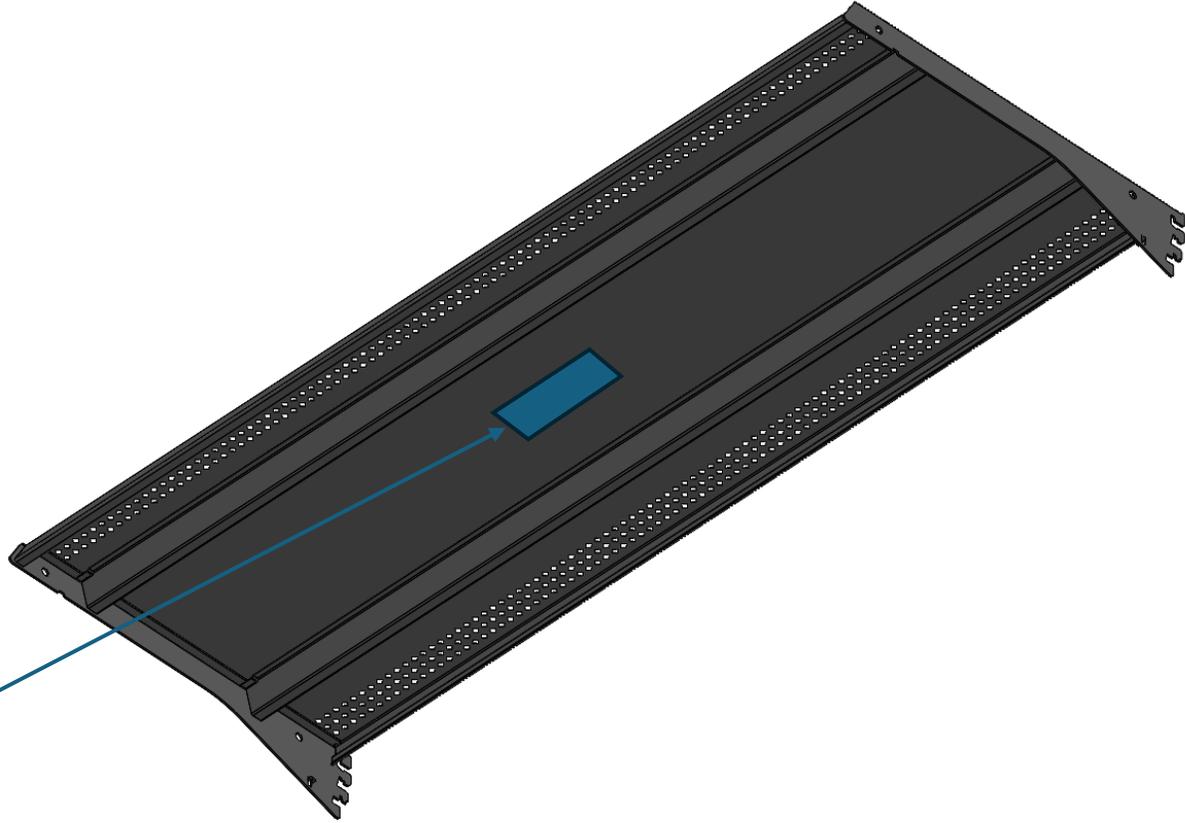

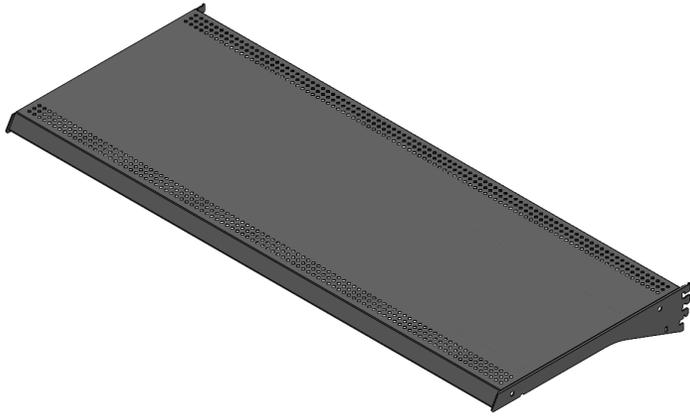

Table Frame Example:

Label inside of frame with Best Buy Part Number and description as close to center as possible

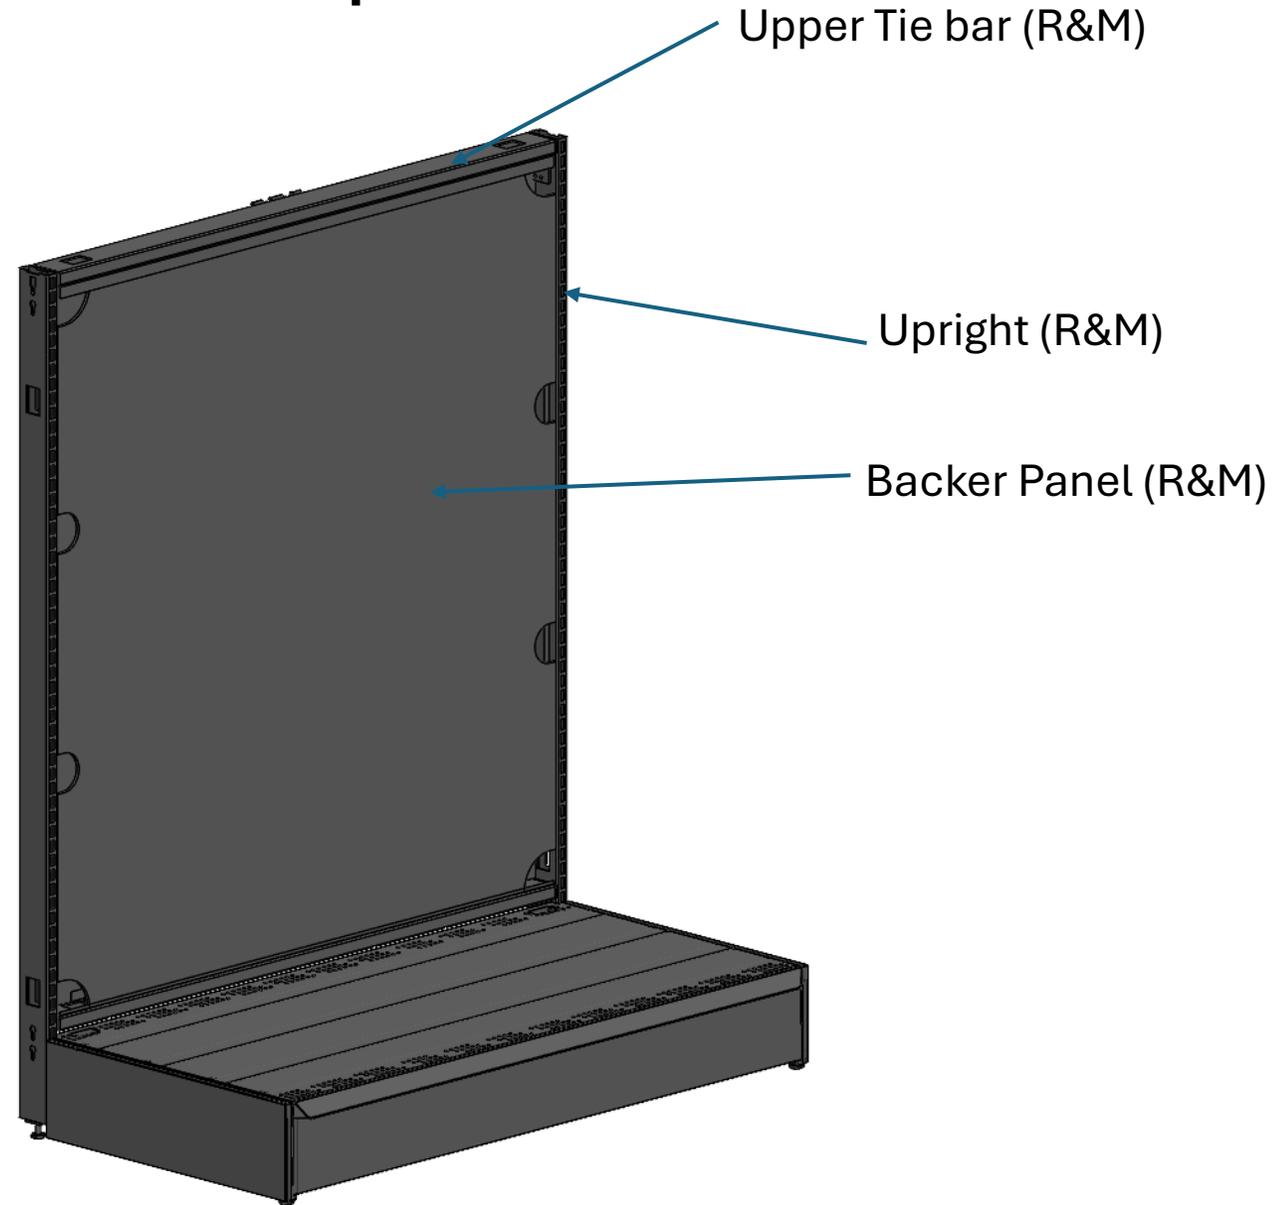

Part Labelling Guide – Shelf Example

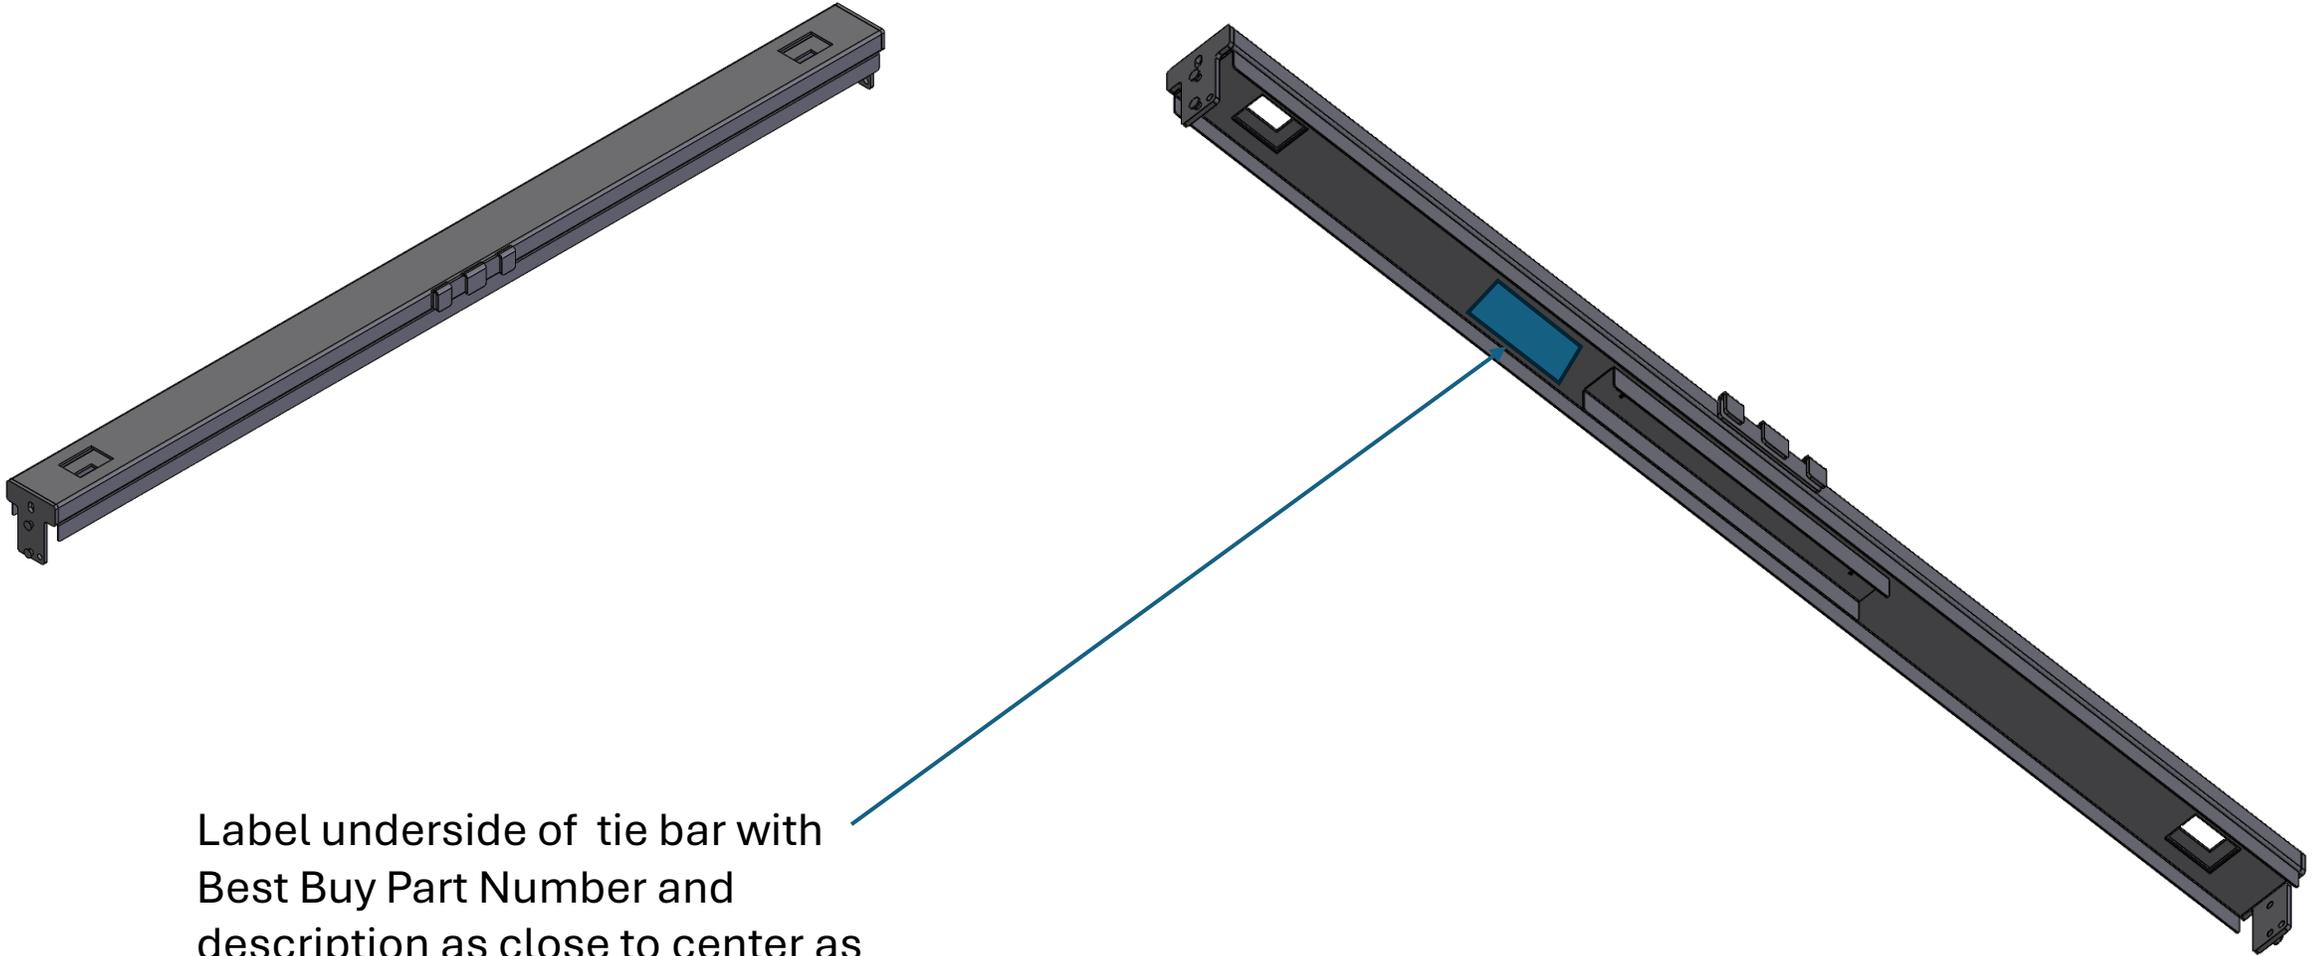

Label underside of shelf with
Best Buy Part Number and
description as close to center as
possible

Part Labelling Guide – Gondola Example

*no kit level number for gondola assembly

Upper Tie Bar Example:

Label underside of tie bar with Best Buy Part Number and description as close to center as possible

Upright Example:

Label inside of upright with Best Buy Part Number and description near the bottom of leg

Backer Panel Example:

Label backside of panel with
Best Buy Part Number and
description as close to bottom
center as possible
